About PHFI

The Public Health Foundation of India (PHFI) is a premier public health institution dedicated to strengthening India's health systems through education, research, training, and policy advocacy. Established as a public-private initiative, PHFI works closely with national and state governments, academic institutions, and global partners to build public health capacity across the country. Through its interdisciplinary expertise, PHFI supports evidence-based policymaking and contributes to addressing emerging and priority health challenges in India.

Within PHFI, the Training Division leads large-scale capacity-building programs for health professionals, government officials, and frontline workers, delivering high-quality, practice-oriented training across diverse public health domains.

The JSW Centre for Climate Change and Health was jointly set up by JSW Foundation and PHFI to focus on strengthening national and sub-national capacity to understand and respond to the health impacts of climate change. The Centre promotes research, training, and policy engagement to support climate-resilient health systems and works closely with government agencies to advance India's climate and health agenda.

Climate Change & Human Health

Climate change is increasingly recognized as one of the most significant public health challenges of our time, influencing the spread of diseases, worsening air quality, intensifying heatwaves, and disrupting food and water security. In India, these impacts are already visible through rising heat-related illnesses, expanding vector-borne diseases, and frequent extreme weather events. As health systems confront these growing risks, there is an urgent need to build knowledge, preparedness, and resilience across all levels of the health sector. This course is designed to equip climate and health professionals with the understanding and skills needed to respond effectively to the health impacts of climate change and to contribute to a climate-resilient future.

Course Fee

₹ 8,000/- + 18% GST
